### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a non-volatile memory device having an ECC circuit. The independent claim 16 recites a non-volatile memory device having an ECC circuit, wherein a program command, address information and first data are received from outside, wherein first non-volatile memory cells are selected and programmed with first data in response to said program command, wherein second non-volatile memory cells are selected and second data stored therein are read out after programming said first non-volatile memory cells, wherein said ECC circuit judges whether said second data includes one or more errors and corrects said second data to create third data when said second data includes one or more errors, and wherein said second non-volatile memory cells are programmed with said third data after said second data is corrected by said ECC circuit. The PRIOR ART fails to disclose or suggest such feature as described in the independent claim 16, therefore, claims 16-22 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571) 272-1871. The examiner can normally be reached on M-F (7:00-3:30).
